

Memo

Office of Institutional Effectiveness to College Council

RE: Diversity Scale Goals

While reviewing evidence for the upcoming HLC visit, it came to the attention of the Office of Institutional Effectiveness that our designated goals related to the tool for Core Heart, the M-Guds Diversity Scale, are not in alignment with the actual measure. Currently, our goals are targeting an average score of 4.5 or higher for the graduating class assessed. However, the tool itself assesses students on a scale of 1 to 4, meaning our intended target should have been 3.5 or higher. This error will need to be corrected in the Data Book, Strategic Plan, and any other official documentation of our Ends goals.

Respectfully,

Matt Malone
Institutional Effectiveness Analyst
Accreditation Liaison Officer
